

REPEL WATER WITH HYDROSHIELD TECHNOLOGY

MP Doors with Hydroshield Technology are engineered to provide protection from water infiltration, allowing you to enjoy the look of real wood without the worry about warping, rotting and delamination. The powerful combination of reinforced fiberglass door panels edged in waterproof composite material and full composite frames repel water and withstand use in the harshest conditions.

Composite Door Frames

Aluminum Composite Sills

Composite Brick Mold

FULL COMPOSITE FRAME SYSTEM

All MP Doors provide a 100% composite door system with Hydroshield Protection.

- **Door Frame:** Full composite frame and optional brickmold is available with a smooth white finish or a textured woodgrain surface that can be painted or stained. Why put a no-rot door in a wood frame?
- **Aluminum Composite Sill:** The MP full composite door system includes a composite sill available in a bronze or mill finish.

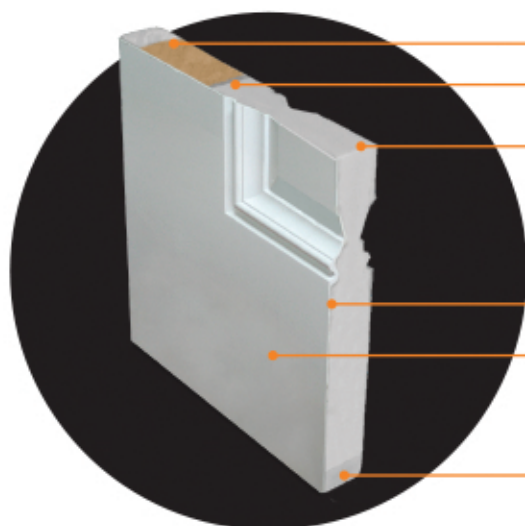

WATERPROOF COMPOSITE STILES

- Stronger screw holding capability
- Better performance than wood stiles—will not delaminate, warp, rot or splinter
- Sealed edges and corners
- No exposed wood

FLUSH GLAZED GLASS INSERT

Our flush glazed glass insert enhances the appearance of the door while adding strength and weather protection. The glazing bead is pre-molded and flush with the door surface, giving a clean finished look.

Composite Stile

LVL Reinforcing

CFC Free Polyurethane Core

- Environmentally friendly - 100% CFC free
- Rigid core to provide dimensional stability
- 6X more energy efficient than wood doors

Deep Embossed Panel

Pre pigmented smooth white skin requires no painting and will not yellow

Composite Rail

Did you know? Our full composite frame system can increase energy efficiency by as much as 10% and is 6 times more energy efficient than a traditional wood door.
